

DENES PAPP

Web application developer

DOWNLOAD RESUME

ABOUT ME

Helo, I'm Denes Papp!

I am a freelancer full stack web application developer with 9 years of experience in web development. My favorite

frameworks are Symfony (backend) and Angular (frontend). I'm building fast, interactive and scalable web applications using REST APIs and strong design patterns. I mainly work for US based companies who find and hire me, but I have experience working with corporations from the EU too. I love travelling, already visited 25 countries and the list is always growing. In my free time I do Krav maga, Crossfit and running. Feel free to contact me :)

WORK EXPERIENCE

2016 - 2017

• Full Stack Developer - Seequers

Seequers is a social platform, bringing people, information, and personal experiences together across a global health, wellness and self care community. This project has a lot of Facebook-like features like timelines, push notifications, friendships, liking, sharing, instant messaging, communities, commenting system, subscriptions, reviews, open/closed groups and many more. Seequers also features an intelligent personalized recommendation engine powered by ElasticSearch. This was a big project which required hundreds of thousands of lines of code on top of the frameworks and integrations with 3rd party tools and services.

Technologies

2014 - 2016

• Full Stack Developer - MoocNation

MoocNation was a MOOC (Massive Open Online Course) aggregator platform with thousands of online courses and a social platform for students to collaborate and share study materials. The project was designed as a singlepage-application where the

frontend has most of the application logic (including templating, routing, etc.) and only uses the backend server through a RESTful API. The MocoNation project involved dozens of 3rd party tool and API integrations.

Technologies

2013

- **Backbone Developer - Web Effects**

Web Effects LLC

I worked with Backbone.js on external projects through Web Effects LLC

Technologies

2011 - 2013
